Professional Summary

Data-focused Computer Science graduate with hands-on experience in data cleaning, exploratory data analysis, statistical analysis, feature engineering, customer segmentation, predictive modeling, and dashboard development. Skilled in Python, SQL, Excel, Power BI, Tableau, Pandas, NumPy, Scikit-learn, and data visualization, with experience transforming raw datasets into actionable insights and communicating findings through clear analytical reports and dashboards.

Education

Sathyabama Institute of Science and Technology, Chennai **2022 – 2026**
B.E. Computer Science and Engineering (Data Science) *CGPA: 7.44/10.0*

Technical Skills

Languages: Python, SQL, Java **Analytics:** Exploratory Data Analysis, Statistical Analysis, Data Cleaning, Data Validation, Feature Engineering
Visualization: Power BI, Tableau, Excel, Matplotlib, Seaborn, Plotly **Libraries:** Pandas, NumPy, Scikit-learn
Databases: PostgreSQL, MySQL, SQLite **Methods:** Regression, Classification, Clustering, Predictive Modeling, Time-Series Analysis
Tools: Git, GitHub, Jupyter Notebook, Linux, Flask, REST APIs

Experience

O Clock Software, Chennai **Sep 2025 – Oct 2025**
Python Developer Intern

- Developed Python workflows for data cleaning, transformation, validation, and preparation of structured datasets for downstream analysis.
- Built reusable scripts for recurring data-processing tasks and standardized preprocessing steps to improve consistency across workflows.
- Investigated missing values, anomalies, and inconsistent records and applied validation logic before downstream processing.
- Used Git for version control, collaborated with developers on issue resolution, and documented data-processing workflows.

Projects

Customer Behavior Analysis and Segmentation *Python, Pandas, NumPy, Scikit-learn, Excel, Tableau*

- Analyzed **1,000 customer records** through data cleaning, exploratory analysis, feature engineering, scaling, and dimensionality reduction.
- Applied PCA and K-Means clustering to identify **6 behavioral customer segments** and compared segment-level characteristics for actionable interpretation.
- Built Excel and Tableau dashboards to communicate customer distributions, behavioral patterns, and segment-level findings to non-technical audiences.

GitHub Repository

Historical Stock Price Analysis and Prediction *Python, Pandas, NumPy, Scikit-learn, Plotly, BeautifulSoup, yfinance*

- Built an end-to-end analytical pipeline covering **4 years of AAPL data (2020–2024)**, web data collection, cleaning, transformation, and exploratory time-series analysis.
- Trained a Random Forest regression model with **100 estimators** using an **80/20 chronological split** and evaluated predictions using Mean Squared Error.
- Generated a **30-day forecast** and interactive Plotly/Matplotlib visualizations comparing historical prices, revenue trends, and model outputs.

GitHub Repository

SalesPilot AI – Sales Analytics Platform *Python, FastAPI, SQL, Recharts*

- Built a sales analytics platform tracking lead engagement, pipeline movement, win/loss rates, deal value, sales cycle, and revenue metrics.
- Implemented explainable 0–100 lead scoring using company, budget, timeline, email engagement, website activity, and intent signals.
- Developed analytics views for funnel conversion, lead-source and industry performance, score distribution, email engagement, and campaign ROI.

GitHub Repository

Patent

FaceFare: Vision-Based Public Transport Payment System Using Deep Learning and Facial Biometrics – Indian Patent Application No. 202641031039 A, filed 15 Mar 2026, published 03 Apr 2026. Co-inventor.

Certifications

NSIC – AI Model Development using MLOps, Feb 2025 | **AWS** – Advantage Pro Certification
